### **Technical Reports**

Technical Reports are research documents that are of sufficient importance to be preserved, but which for some reason are not appropriate for primary scientific publication. Inquiries concerning any particular Report should be directed to the issuing establishment.

### **Rapports Techniques**

Les rapports techniques sont des documents de recherche qui revêtent une assez grande importance pour être conservés mais qui, pour une raison ou pour une autre, ne conviennent pas à une publication scientifique prioritaire. Pour toute demande de renseignements concernant un rapport particulier, il faut s'adresser au service responsable.

## INTRODUCTION

This bibliography is the third in a continuing series and contains a further 1,000 references and the freshwater features to which they refer.

Amendment lists for Nos.1 and 2 of this series are included and recipients are advised to amend their copies as soon as possible.

Commencing with this issue, only those freshwater features whose names and coordinates have been approved by the Canadian Permanent Committee on Geographical Names will be included in these Bibliographies. Unapproved features will be listed separately and kept by the compiler until they become approved.

Bibliographies Nos.1 and 2 are published in this series as Technical Reports Nos. 471 and 504 respectively.

## INTRODUCTION

Cette bibliographie est la troisième de la série. Elle contient 1,000 références nouvelles ainsi que les noms des entités d'eau douce auxquelles elles s'appliquent.

Les destinataires recevront aussi des correctifs pour les bibliographies n° 1 et 2 et sont priés de corriger leurs exemplaires dès que possible.

Désormais, seules les entités d'eau douce dont les noms et les coordonnées auront été approuvés par le Comité permanent canadien des noms géographiques seront incluses dans les bibliographies. Les entités n'ayant pas été approuvées seront placées sur une liste d'attente jusqu'à leur approbation.

Les bibliographies no. 1 et 2 sont publiées dans les Rapports Techniques no. 471 et 504 respectivement.

## USER'S GUIDE

1. To use this bibliography it is essential that reference first be made to the relevant Gazetteer in order to verify both the name and geographical position of the freshwater feature required.
2. The index contains 1,000 references, each identified by a number, and placed in numerical order.
3. The bibliography is divided into provinces, in alphabetical order, and each contains (a) a list of freshwater features in alphabetical order, (b) their coordinates as given in the Gazetteers, and (c) the relevant reference index number(s).
4. All names and coordinates of freshwater features in this bibliography have been or will be approved by the C.P.C.G.N.
5. When there is a change of name of a freshwater feature, it invariably becomes out of alphabetical order. It is then deleted and entered into the latest issue. Thus some of the reference index numbers given here refer to the previous two Bibliographies.

## GUIDE D'UTILISATION

1. Pour utiliser cette bibliographie, il est essentiel de se reporter tout d'abord au répertoire géographique approprié afin de vérifier le nom et le lieu de l'entité d'eau douce recherchée.
2. L'index contient 1,000 références identifiées individuellement par un numéro et placées par ordre numérique.
3. La bibliographie est divisée en provinces, par ordre alphabétique. Chaque division comprend: a) une liste des entités d'eau douce placées par ordre alphabétique, b) leurs coordonnées telles qu'elles paraissent dans les répertoires géographiques, et c) les numéros correspondants dans l'index.
4. Tous les noms et toutes les coordonnées des entités d'eau douce paraissant dans cette bibliographie ont été ou seront approuvés par le Comité.
5. Quand le nom d'une de ces entités est changé, il ne figure plus par ordre alphabétique. Il est enlevé et joint à la dernière parution, ce qui explique que certains numéros de référence donnés ici renvoient aux deux bibliographies précédentes.

### ACKNOWLEDGEMENTS

The compiler expresses his appreciation to Mr. Alan Rayburn, Executive Secretary to the Canadian Permanent Committee on Geographical Names, for his continual help in identifying many of the features whose names or coordinates are either unknown or incorrect.

Appreciation is also expressed to Mrs. Emma Fosdick, Librarian at the Canada Centre for Inland Waters, and her staff, for cheerfully complying with my requests for inter-library loans.

I would also like to thank Dr. M.G.Johnson, Director of this laboratory, whose initial encouragement was responsible for the publication of this series.
