RECOVERIES OF SALMON TAGGED OFFSHORE IN THE NORTH PACIFIC OCEAN

BY CANADA, JAPAN, AND THE UNITED STATES, 1956 TO 1969

INTRODUCTION

Following establishment of the International Convention for the High Seas Fisheries of the North Pacific Ocean between Canada, Japan, and the United States, the three countries undertook a major research program, using many different approaches, to study salmon on the high seas. One means of gaining an understanding of the distribution and movement of salmon was through tagging. Accordingly, large numbers of Pacific salmon (genus *Oncorhynchus*) and steelhead trout (*Salmo gairdneri*) were tagged in the North Pacific by the United States from 1956 onward, by Japan from 1958 onward, and by Canada from 1960 to 1967. Some results of the taggings have been reported in Annual Reports of the International North Pacific Fisheries Commission for the years 1956 to 1968. Results of the earlier taggings by Japan were reported by Kondo et al. (1965), and by the United States by Hatt (1962 and 1966). Most of the recoveries of Canadian tags have been listed by Giovando (1969). In addition, tag recoveries have been reported in other documents submitted by the three countries to the International North Pacific Fisheries Commission (INPFC). These include INPFC Document No. 410, 515, 566, 597, 600, 621, 706, 739, 793, 886, 974, 975, 1116, 1230 and 1327 submitted by Canada; INPFC Document No. 184, 269 - Rev. 2, 324, 353, 379, 418, 448, 449, 453, 485, 489, 514, 518, 520, 545, 545 - Suppl. No. 1, 554, 554 - Suppl. No. 1 and 2, 619, 627, 682, 738, 754, 796, 796 - Suppl., 797, 803, 892, 982, 1092, 1112, 1202 and 1203 submitted by Japan; and INPFC Document No. 186, 232, 277, 335 - Rev. 1, 351, 417, 417A, 446, 450, 451, 472 - Rev. 1, 519, 520, 567, 605, 617, 753, 755, 780, 791, 859, 887, 976, 977, 1095, 1096, 1097, 1156, 1198, 1219, 1236 and 1277 submitted by the United States.¹

This report consists of IBM listings providing under one cover the basic data for all tag recoveries reported in the publications and INPFC Documents mentioned above. The Canadian data include all tags which were returned up to September 30, 1970 (INPFC Document No. 1327). Recoveries of Japanese tags include all recoveries reported to September 1969 (INPFC Document No. 1203). The information on Japanese tags was coded and punched on IBM cards at the Nanaimo Biological Station using data from Japanese documents and additional information provided by the Japan Fisheries

¹INPFC Documents are not publications of the International North Pacific Fisheries Commission. They are documents prepared by the national sections and are available for public use only at the discretion of the originating agencies.

Agency. The United States data include recoveries from taggings carried out from 1956 to 1969 by the Fisheries Research Institute of the University of Washington under contract with the United States Fish and Wildlife Service's Bureau of Commercial Fisheries and from taggings in 1967, 1968, and 1969 by the Alaska Department of Fish and Game. The Fisheries Research Institute data include all tag recoveries reported to May 1, 1970 (INPFC Document No. 1277). A duplicate set of IBM cards of their tag recoveries was provided by the Fisheries Research Institute. The Alaska Department of Fish and Game tag recoveries include all recoveries reported to May 31, 1970. The data on recoveries of Alaska Department of Fish and Game tags were coded and punched on IBM cards at the Nanaimo Biological Station from information in United States documents and from additional information provided by the Alaska Department of Fish and Game.

TAG RECOVERIES

In this report are listed a total of 15,215 tag recoveries (Table 1) of which 13,983 (5,815 sockeye, 2,024 chum, 5,225 pink, 796 coho, 74 chinook, and 49 steelhead) were recovered in the year of tagging and 1,232 (488 sockeye, 460 chum, 54 pink, 179 coho, 35 chinook, and 16 steelhead) were recovered in years subsequent to the year of tagging. The actual recoveries are listed in Tables 4 and 5 for sockeye, Tables 6 and 7 for chum, Tables 8 and 9 for pink, Tables 10 and 11 for coho, Tables 12 and 13 for chinook, and Tables 14 and 15 for steelhead. For each species the first table includes recoveries in the tagging year, the second table recoveries in years subsequent to tagging year. Included with recoveries in the tagging year (Tables 1, 4, 6, 8, 10, 12 and 14) are recoveries in spawning streams of tagged fish (mainly steelhead) which are believed to have entered the streams in the year of tagging but which were recovered in the early months of the following year. The tag recoveries in Tables 4 to 15 are grouped by area of recovery within the INPFC statistical areas (see Fig. 1 and the explanatory section below) in which the fish were tagged. The tagging areas are arranged in order from north to south moving across the North Pacific from west to east. Tables 2 and 3 give the IBM coding for areas of recovery which are discussed on page 6 in the following section.

EXPLANATION OF RECOVERY TABLES

Tables 4 to 15 list the following data:

AGY (Agency)

Tags were released by the following agencies:

- 3 -
- 1 = Fisheries Research Institute, U.S.A.
 - 2 = Fisheries Research Board of Canada
 - 3 = Fisheries Agency, Japan
 - 4 = Alaska Department of Fish and Game, U.S.A.

AREA

The INPFC statistical area in which the fish was tagged (Fig. 1). Each area is 5° longitude by 2° latitude described from the southwest corner. For example, INPFC Area W6052 includes all points between 160°00' and 155°01' west longitude and between 52°00' and 53°59' north latitude. The letters "W" and "E" are used to indicate west or east longitude. For reasons of convenience, areas immediate east of 180° have been described with the letter W. For areas which are bisected by the Kuril Islands or the Aleutian Islands the letters "O", "P", or P have been added to indicate if the tag was released in the Sea of Okhotsk, the Bering Sea, or the Pacific Ocean, respectively.

LOCATION (Location of tagging)

LAT. (Latitude)

Degress and minutes of north latitude, e.g. 5025 = 50°25' North.

LONG. (Longitude)

Degrees and minutes of east or west longitude, e.g. 6210E = 162°10' East. The first digit of degrees has been omitted.

DATE (Date of tagging)

The date of tagging is indicated by two digits for month (01 to 12 for January to December), by two digits for the day (01 to 31) of the month, and two digits for the last two digits of the year.

SET NO. (Set number)

For Fisheries Research Institute and Canadian data the set number consists of a coded number or letter, which indicates the tagging vessel, and a three digit set number. The set numbers were assigned consecutively starting at 001 for each vessel at the beginning of the season. For example, B136 is set number 136 for vessel B, the Canadian No. 1. The vessel codes are as follows:

Canada, 1960 to 1964

- 1 = Skardale
- 2 = Western Crusader
- 3 = Western Producer
- 4 = Midnight Sun
- 5 = G. B. Reed
- 6 = T. W. Zelley
- 7 = Key West
- 8 = Fort Ross

Canada, 1965 to 1967

A = G. B. Reed - spring and summer cruises
B = Canadian No. 1
C = T. W. Sea Queen
D = Investigator No. 1
E = A. P. Knight
Z = G. B. Reed - autumn and winter cruises

Fisheries Research Institute

A = California Rose
C = Commander
H = Harmony
K = Kelez
O = Ocean Pride
R = Renown
S = St. Michael
T = Karen T
U = Windward
X = Storm

Set numbers have not been included for tags released by the Alaska Department of Fish and Game.

For Japanese tags the operation number, which corresponds to set number, has been included for tags wherever it was readily available.

GEAR

The gear used to capture fish for tagging were as follows:

1 = Purse seine
2 = Gillnet
3 = Longline

TAG NO. (Tag number)

Tag numbers may consist of a 4, 5, or 6 digit number, a single letter prefix followed by a 4 or 5 digit number, or a double letter prefix followed by a 4 digit number.

SP. (Species)

1 = Sockeye or red
2 = Chum or dog
3 = Pink or hump
4 = Coho or silver
5 = Chinook, king, or spring
6 = Steelhead

Where species identification at recovery differed from that at release, scales taken during tagging were used for final identification.

LEN. (Length)

Length at release in millimetres. Fish were measured from tip of snout to fork of tail. Lengths were recorded in a variety of ways; to nearest millimetre, to nearest half centimetre, or to nearest centimetre.

AGE

Age at release as determined by examination of scales taken at release.

The first digit indicates the number of winters in fresh water.

- 0-4 = Winters in fresh water based on scale annuli.
- Blank = The freshwater age was not shown for fish tagged by the Fisheries Research Institute in the years 1956 to 1960. For Fisheries Research Institute data in 1961 and subsequent years, the freshwater age was left blank if a scale was illegible or missing for sockeye, coho, chinook and steelhead only and to indicate zero winters in fresh water for pink and chum only.
- = Where a scale was illegible or missing in the Japanese data, the freshwater age was left blank for sockeye, chum, coho, and chinook. For pink, where the scale was illegible or missing, zero was assigned for winters in fresh water.
- = In the Canadian data where a scale was illegible or missing, freshwater age was left blank for sockeye, coho, chinook, and steelhead. Zero winters in fresh water were assigned for pink and chum where the scale was illegible or missing.
- = For Alaska Department of Fish and Game data, the freshwater age was left blank where a scale was illegible or was not available.

The second digit indicates the number of winters at sea.

- 0-5 = Winters at sea based on scale annuli
- 6 = Zero winters (based on length)
- 7 = One winter (based on length)
- 8 = Two winters (based on length)
- 9 = Three or more winters (based on length)
- Blank = Scale illegible or missing, and no interpretation of age.

SCALE NO. (Scale number)

Assigned number for the scale sample taken at release. For Fisheries Research Institute and Canadian data a scale number consists of a letter followed by a two digit number. The scales were mounted on scale cards

in the order in which the fish were caught. In each set the cards were lettered consecutively commencing at A and the scales were numbered consecutively on each card from 01 to 50. Thus scale number B32 is the thirty-second scale on the second card (scale card B) and is from the eighty-second fish tagged in a particular set. Japanese scale numbers, which consist of a three digit number, have been included wherever they were readily available.

AREA

The general recovery area and the recovery subareas. The first two digits indicate the general recovery area, the third digit the sub-area (if any) of that general recovery area. For example, a recovery in area 72-6 would be in general recovery area 72 (Skeena River), sub-area 6 (Babine-Morrison Lakes). The recovery subareas are not given in Fisheries Research Institute data for the years 1956 to 1963. The general recovery areas and recovery subareas are listed in Tables 2 and 3, respectively, and are illustrated in Fig. 2 to 9.

LOCATION (Location of recovery)

LAT. (Latitude)

Degrees and minutes of north latitude, e.g. 5123 = 51°23' North.

LONG. (Longitude)

Degrees and minutes of east or west longitude, e.g. 5630E = 156°30' East. The first digit of degrees has been omitted.

DATE (Date of recovery)

The first two digits indicate the month and year of recovery, the last two digits the day of recovery.

The month and year of recovery are indicated as follows:

| | |
|-------|--|
| 00 | = Recovery month and year unknown. |
| 01-12 | = Recovery month in first year (year of tagging) |
| 13-24 | = " " second " (months 12) |
| 25-36 | = " " third " (" 24) |
| 37-48 | = " " fourth " (" 36) |
| 49-60 | = " " fifth " (" 48) |

01, 13, 25, 37, or 49 are used when year is known but month and day are unknown.

The day of recovery is indicated as follows:

| | |
|-------|--|
| 00 | = Day of month unknown |
| 01-31 | = Day of month |
| 32 | = Day and month unknown but year known |

When year is known but month and day are unknown recovery date is coded 0132, 1332, 2532, 3732, or 4932 depending upon year of recovery. 0000 is used when year, month, and day of recovery are all unknown.

M. (Method of recovery)

- 0 = Unknown
- 1 = Drift gillnet
- 2 = Set gillnet
- 3 = Seine
- 4 = Troll
- 5 = Trap
- 6 = Stream (live recoveries taken by weir, hooks, fishwheel, spear, etc.)
- 7 = Stream (dead recoveries)
- 8 = Longline
- 9 = Commercial gear - type unknown (1966 and subsequent years). "Trawl net" for some recoveries of Japanese tags in the U.S.S.R.

LEN. (Length at recovery)

Length at recovery in millimetres as reported by finder. If no measurement was available, length at recovery is either blank or is indicated as 000.

WT. (Weight at recovery)

Body weight at recovery in decagrams except for fish tagged by the Fisheries Research Institute from 1956 to 1963 where this category is body weight at release. For these fish body weight at recovery is listed under "GONAD WEIGHT". If no weight was available, body weight is either blank or is indicated as 000. Body weights exceeding 998 decagrams are indicated as 999.

SEX (Sex and maturity at recovery)

- 1 = Male - unknown maturity
- 2 = Male - mature
- 3 = Male - immature
- 4 = Female - unknown maturity
- 5 = Female - mature
- 6 = Female - immature
- 7 = Unknown sex and maturity
- 8 = Unknown sex - mature
- 9 = Unknown sex - immature

GONAD WT. (Gonad weight)

Gonad weight at recovery in grams except for fish tagged by the Fisheries Research Institute from 1956 to 1963 where this category is body

weight (in decagrams) at recovery. If no weight was available, gonal weight is either blank or is indicated as 000. Gonad weights exceeding 998 grams are indicated as 999.

ACKNOWLEDGEMENTS

The Japanese and United States data are reproduced through the kind permission of Dr. T. Matsushita and Dr. G. B. Collins, respectively.

The authors are grateful to Dr. M. P. Shepard for advice in preparing the report.
