# Foreword

The Freshwater Fish Marketing Corporation (FFMC) and the Department of Fisheries and Oceans, Central and Arctic Region (DFO) have, for close to thirty years, co-operated in the development and maintenance of a commercial fisheries database. The harvest data are developed from the FFMC's purchase ticket, which records the catch and payment for every sales transaction between individual harvesters and the FFMC. The database provides comprehensive information on the commercial fishery (i.e. fish harvesters, lakes, delivery points, species, sizes of fish, product forms, weeks, months, seasons of fishing, etc.). These data have been used by the FFMC, DFO, and the fisheries management agencies of the participating provinces and territory in the FFMC's area of operation. Data are also provided on request to other federal, provincial or territorial agencies, universities, and others interested in fisheries. The participating jurisdictions include Manitoba, Saskatchewan, Alberta, the Northwest Territories, and select parts of the northwest region of Ontario.

This report focuses on commercial freshwater fish harvesting activity in FFMC participating jurisdictions from May 1, 2003 to April 30, 2004. Marketing and historical trend information is included.

Section 1 provides harvesting and marketing data. Section 2 provides comparative analyses of each FFMC participating jurisdiction. Sections 3 through 7 provide similar analyses for each FFMC participating jurisdiction.

Persons interested in obtaining more information on commercial freshwater fisheries in FFMC participating jurisdictions may contact:

# Highlights

## 2003-2004

The following is a brief summary of key trends on commercial freshwater fish harvesting activity in FFMC participating jurisdictions for the fiscal year 2003-04. This section is intended to provide highlights on landings, landed and market values, and the number of self-employed harvesters. Please see sections 1 through 6, for detailed data tables and trend analyses.

### **Section 1: *Western Canadian Freshwater Fisheries Summary***

- 20,548 metric tonnes (t) of fish were harvested. Landings are down by 8.9% from 2002-03.
- The landed and market values of the harvest were \$33.3 million and \$66.8 million, respectively.
- Of the total landings of 20,548t, whitefish accounts for 32.6%, up from 30.7% in 2002-03, pickerel accounts for 27.3%, up from 22.8% in 2002-03, mullet accounts for 18.2%, down from 22.7% in 2002-03, and northern pike accounts for 10.9% up from 10.6% in 2002-03.
- Landings decreased for most species, except for pickerel and lake trout which are up by 9.3% and 17.6%, respectively.
- Of the total landings of 20,548t, Lake Winnipeg (6,601t) accounted for the largest volume distantly followed by Lake Manitoba (1,739t), and Lake Winnipegosis (1,627t).
- The FFMC purchased catch from 2,918 self-employed harvesters in 2003-04 compared to 2,833 in 2002-03, an increase of 2.9.

### **Section 2: *Analysis by Jurisdiction***

- Manitoba harvesters caught 68.0% of the total harvest and received 77.0% of the landed value which can be attributed to the high value of pickerel. Saskatchewan harvesters caught 17.0% of the harvest and received 12.0% of the landed value. Alberta caught 10.0% and received 7.0%. Northwest Territories caught 5.0% and received 4.0%.

- Of the total 2,918 harvesters, Manitoba has 1,931 (66.0%), Saskatchewan has 719 (25.0%), Northwest Territories has 146 (5.0%), and Alberta has 122 (4.0%).

### **Section 3 - 6: Provincial Overview - (*Alberta, Saskatchewan, Manitoba, Northwest Territories*)**

#### ***Alberta:***

- 1,950t of fish were harvested. Landings are down by 14.3% from 2002-03.
- Landings for all species are down from the previous year. Whitefish, which accounts for 92.0% of provincial landings, are down by 12.1%.
- The landed and market values of the harvest are \$2.4 million and \$3.5 million, respectively. Total landed value decreased by 29.3% from 2002-03.
- Lesser Slave Lake Lake accounted for the largest volume (38.4%) followed by Lake Utikuma (24.8%).
- There are 122 self-employed harvesters in 2003-04 down from 124 in 2002-03. The number of self-employed summer and winter seasons' harvesters are up by 2.9% and 13.5% in 2003-04, respectively while the number of self-employed harvesters in both seasons is down by 15.4%.

#### ***Saskatchewan:***

- 3,507t of fish were harvested. Landings are down by 18.1% from 2002-03.
- Whitefish accounts for 33.6% of the total harvests, up from 32.8% in 2002-03. Mullet accounts for 19.3%, down from 26.4% in 2002-03.
- The landed and market values of the harvest are \$3.8 million and \$9.8 million, respectively. The total landed value is down by 24.5% in 2003-04.
- Reindeer accounted for the largest volume (13.0% of 3,507t) followed by Ile-a-la Crosse (8.0% of 3,507)
- The number of self-employed harvesters is up by 2.28% to 719 in 2003-04. Winter season harvesters are up by 5.1% in 2003-04 and summer season is up slightly by 0.8%. The number of self-employed harvesters who worked both summer and winter was down by 13.7%.

#### ***Manitoba:***

- 13,980t of fish were harvested. Landings are down by 6.2% from 2002-03.

- Of the major species, landings for sauger, mullet, and perch are down while landings for whitefish, northern pike, and pickerel are up in 2003-04. Pickerel, which accounts 34.0% of the total harvests, landings rose by 11.0% in 2003-04. On the other hand, mullet, which accounts for 22.0%, landings were down by 23.7% in 2003-04.
- The landed and market values of the harvest are \$25.8 million and \$51.6 million, respectively. Total landed value is down by 17.8% from the previous year.
- Lake Winnipeg accounts for most of the catch (47.0% of 13,980t) followed by the Lake Winnipegosis and Lake Manitoba (12.0% of 13,980t respectively).
- The number of self-employed harvesters is 1,931, up by 3.9% from the previous year. The number of self-employed summer season harvesters is up by 2.4% in 2003-04 and is down by 3.4% for winter season. The number of self-employed harvesters for both seasons is up by 16.3% in 2003-04.

***Northwest Territories:***

- 1,090t of fish were harvested. Landings are up by 0.4% from 2002-03.
- Whitefish accounts for 76.0% of the total harvests up by 3.4 % from the previous year. Followed by northern pike accounts for 5.0% of the total harvests.
- The landed and market values of the harvest are \$1.2 million and \$1.7 million, respectively. The total landed value is down by 9.3% from 2002-03.
- Great Slave Lake accounts for most for the landings (98.0% of 1,090t). Followed by Lake Kakisa (2.0% of 1,090t).
- The number of self-employed harvesters remained the same as the orevious year at 146. The number of self-employed harvesters in the summer season decreased by 20%. Both winter and both seasons increased by 18%, and 13% respectively in 2003-04.

## Annual Summary of Harvesting Activities: *At a Glance*

	Jurisdiction				
	Alberta	Saskatchewan	Manitoba	NWT	Total*
Landings (t)	1,950	3,506	13,980	1,090	20,549
% Change from 2002-2003	-14.3%	-18.1%	-6.2%	0.4%	-8.9%
Landed Value (\$000)	2,445	3,885	25,801	1,202	33,345
% Change from 2002-2003	-22.7%	-24.4%	-17.8%	-9.3%	-18.8%
Self-Employed Harvesters	122	719	1,931	146	2,919
% Change from 2002-2003	-1.6%	2.3%	3.9%	0.1%	3.0%
Major Harvested Species	whitefish, pickerel, northern pike	whitefish, mullet, pickerel, northern pike, lake trout	whitefish, pickerel, sauger, northern pike, perch, mullet	whitefish, pickerel, lake trout, northern pike, inconnu	whitefish, pickerel, sauger, northern pike, mullet, lake trout

*Note: \* includes Northwestern Ontario; \*\* To protect the identities of harvesters where the number of harvesters is three or less, the “rule of three” <4 (less than four) is used.*

## Glossary of Terms:

**Delivery Point:** A delivery point is a fish facility where fish harvesters sell their catches directly to the FFMC or indirectly through agents of the FFMC.

**Fiscal Year:** A fiscal year refers to the period from May 1 through to April 30 of the subsequent year. There are two fishing seasons in a fiscal year. Thus, 2004-2005 refers to the period May 1, 2004 to April 30, 2005. The summer season, which is the open water fishery, begins May 1 and ends October 30. The winter season is an ice fishery that begins when the lakes freeze, around November 1, and continues until spring thaw, usually about April 30.

**Landed Quantity:** The landed quantity is an estimate reflecting the weight of fish marketed to the FFMC by commercial harvesters. (Federal and provincial law requires harvesters to sell their catches, excluding sales made directly to final consumers, to the FFMC.) This estimate expresses the catch as if it were all harvested in one form, the live weight equivalent. Due to fish harvester's selling fish in a variety of forms (round, gutted, and gutted with head off), conversion factors are used to determine the live weight equivalent.

**Landed Value:** The landed value represents the payments received by fish harvester for fish sales to the FFMC. The payments are generally recorded *f.o.b. lakeside* although in some cases, especially in the north, payments are *f.o.b. a central delivery point* which may be some distance from the lake where fish are harvested. Harvesters receive both initial and final payments for their catches, the final payment is dependent on the FFMC's net earnings for the period. The landed values reported reflect the respective year's Canadian dollar value and include both the initial and final payments.

**Marketed Value:** The marketed value estimates the value of the year's catch as the product of the landed quantity of each species and the average market selling price for the year. Because the estimates do not carryover inventory from year to year, market value differs from the FFMC statement of annual fish sales.

**Nominal Dollars:** Nominal dollars are the current dollar amounts paid or received at the time of harvest or sale. Nominal dollars are not adjusted for inflation.

**Product Weights:** Product weights are the actual weights of the final product sold. Fish are sold in a variety of products forms (round, dressed fillets, deboned blocks, etc.) and product weights should not be confused with live equivalent weights.

**Self-Employed Harvester:** A self-employed fish harvester is generally the owner/operator of the fishing business. All self-employed harvesters must be licensed for commercial fishing. Note that in the tables reporting the distribution of landed values, the "rule of three" is used to protect the identities of fish harvesters who fall within an income interval that contains three or less harvesters. In such cases, the symbol <4 is used.

**Full Time Equivalent Employment:** Full time equivalent employment is calculated based on information for harvesting activities only and not associated with processing activities. It is calculated by dividing the number of weeks worked by the number of weeks (52) in a given year.

## Annex: Western Canadian Freshwater Fisheries - *List of Species*

Common Name	Genus Name
Carp	Cyprinus carpio
Goldeye	Hiodon alosoides
Inconnu	Stenodus leucichthys
Lake Trout	Salvelinus namaycush
Mullet	Catostomus commersonii
Northern Pike	Esox lucius
Perch	Perca flavescens
Pickrel	Sander vitreus
Sauger	Sander canadensis
Tullibee	Coregonus artedii
White Bass	Morone chrysops
Whitefish	Coregonus clupeaformis
