Activities, Volume 18, 1999-2000: xiii + 88 p.

Foreword

The Freshwater Fish Marketing Corporation (FFMC) and the Department of Fisheries and Oceans, Central and Arctic Region (DFO) have, for more than thirty years, co-operated in the development and maintenance of a commercial fisheries database. The harvest data are developed from the FFMC's purchase ticket, which records the catch and payment for every sales transaction between individual harvesters and the FFMC. The database provides comprehensive information on the commercial fishery (e.g. fish harvesters, lakes, delivery points, species, weeks, months, seasons of fishing, etc.). This data has been used by the FFMC, DFO, and the fisheries management agencies of the participating provinces and territory in the FFMC's area of operation. Data is also provided on request to other federal, provincial or territorial agencies, universities, and others interested in fisheries. The participating jurisdictions include Manitoba, Saskatchewan, Alberta, the Northwest Territories, and select parts of the northwest region of Ontario.

This report focuses on commercial freshwater fish harvesting activity in FFMC participating jurisdictions from May 1, 1999 to April 30, 2000. The period covers two distinct fishing seasons, the open water, summer fishery from May through October and the on ice, winter fishery from November through April. Marketing and historical trend information is included.

Section 1 provides harvesting data. Section 2 provides comparative analyses of each FFMC participating jurisdiction. Sections 3 through 6 provide similar analyses for each FFMC participating jurisdiction. Northwestern Ontario has been excluded from this section in consideration of the low percentage share of the province in freshwater fisheries. However, Northwestern Ontario has been included in Section 1 providing data by jurisdiction.

Persons interested in obtaining more information on commercial freshwater fisheries in FFMC participating jurisdictions may contact:

Highlights 1999-2000

The following is a brief summary of key trends on commercial freshwater fish harvesting activity in FFMC participating jurisdictions for the fiscal year 1999-2000. This section is intended to provide highlights on landings, landed and market values, and the number of self-employed harvesters. Please see sections 1 through 6, for detailed data tables and trend analyses.

Section 1: *Western Canadian Freshwater Fisheries Summary*

- 21,587 metric tonnes (t) of fish were harvested. Landings are up by 18.7% from 1998-99.
- The landed and market values of the harvest were \$35.9 million and \$58.8 million, respectively.
- Of the total landings of 21,587t, whitefish accounts for 25.9%, down from 29.1% in 1998-99, mullet accounts for 27.5% up from 21.0% in 1998-99, pickerel accounts for 21.4%, up from 20.3% in 1998-99, and northern pike accounts for 13.1% down from 14.4% in 1998-99.
- Of the major species, landings for lake trout and sauger are down in 1999-2000 compared to the previous year.
- Of the total landings of 21,587t, Lake Winnipeg (5,334t) accounted for the largest volume distantly followed by Lake Manitoba (2,715t), Lake Winnipegosis (2,557t), and Great Slave (1,212t).
- The FFMC purchased catch from 2,679 self-employed harvesters in 1999-2000 compared to 2,510 in 1998-99, a rise of 6.7%. The number of self-employed harvesters is up in all landings ranges.

Section 2: *Analysis by Jurisdiction*

- Manitoba harvesters caught 67.9% of the total harvest and received 75.9%. Saskatchewan harvesters caught 17.5% of the harvest and received 13.0% of the landed value. Alberta caught 8.8% and received 6.9%. Northwest Territories caught 5.8% and received 4.3%.

- Of the total 2,663 harvesters, Manitoba has 1,805 (67.8%), Saskatchewan has 561 (21.1%), Alberta has 166 (6.2%) and Northwest Territories has 131 (4.9%).

Section 3 - 6: Provincial Overview - (*Alberta, Saskatchewan, Manitoba, Northwest Territories*)

Alberta:

- 1,903t of fish were harvested. Landings are up by 8.2% from 1998-99.
- Except pickerel, landings for all species are up from the previous year. Whitefish, which accounts for 80.8% of provincial landings, up by 2.2%.
- The landed and market values of the harvest are \$2.5 million and \$4.4 million, respectively. Total landed value is up by 17.1% from 1998-99.
- Of the landings harvested from major lakes, Lesser Slave Lake accounted for the largest volume (61.8%) followed by Utikuma Lake (31.7%).
- There were 166 self-employed harvesters in 1999-2000 down from 169 in 1998-99, a fall by 1.8%. The decrease was caused by the fall in summer season harvesters.
- The number of self-employed summer season harvesters is down by 27.4% in 1999-2000 while the number of self-employed winter season harvesters is up by 4.7%. The number of self-employed harvesters in both seasons is up by 18.0%.

Saskatchewan:

- 3,761t of fish were harvested. Landings rose by 13.6% from 1998-99.
- Of the major species, except for lake trout, landings for all species increased in 1999-2000. Whitefish accounts for 29.2% of the total harvests, up from 28.5% in 1998-99, followed by mullet at 26.3%, up from 21.6% in 1998-99.
- The landed and market values of the harvest are \$4.6 million and \$8.7 million, respectively. The total landed value is up by 7.7% in 1999-2000.
- Ile-a-la Crosse lake accounted for the largest volume (8.9% of 3,761t) closely followed by Reindeer Lake (8.5% of 3,761t).
- The number of self-employed harvesters is up from 540 in 1998-99 to 561 in 1999-2000. The number of self-employed summer season harvesters is down by 9.9% in 1999-2000 while the number of self-employed winter season harvesters is

up by 10.3%. The number of self-employed harvesters who worked both summer and winter rose by 65.4%.

Manitoba:

- 14,633t of fish were harvested. Landings rose by 23.9% from 1998-99.
- Of the major species, landings for whitefish, pickerel, and mullet are up while those of sauger, northern pike and perch are down in 1999-2000 compared to the previous year. Mullet landings, which accounts for 33.4% of total landings, is up by 58.5% and pickerel landings, which accounts for 27.5% of total landings, is up by 30.6% in 1999-2000.
- The landed and market values of the harvest are \$27.2 million and \$42.8 million, respectively. Total landed value is up by 17.3% from the previous year.
- Lake Winnipeg accounts for most of the catch (36.4% of 14,633t) followed by the Lake Manitoba (18.6% of 15,016t).
- The number of self-employed harvesters is 1,805, up by 4.7% from the previous year. The number of self-employed summer season harvesters is up by 7.9% while that of winter season is down by 10.8% in 1999-2000. The number of self-employed harvesters who worked both summer and winter seasons is up by 28.1%.

Northwest Territories:

- 1,245t of fish were harvested. Landings fell by 4.3% from 1998-99.
- Of the major species, except for whitefish and inconnu, landings of all other species are up in 1999-2000. Whitefish accounts for 71.3% of the total harvests 1,245t and is up by 3.7% in 1999-2000. In contrast, northern pike, pickerel, and lake trout which account for 10.7%, 3.0% and 3.0% of 1,245t, respectively, are down by approximately 22.7% in 1999-2000.
- The landed and market values of the harvest are \$1.5 million and \$2.7 million, respectively. The total landed value is up by 5.3% from 1998-99.
- Great Slave Lake accounts for most for the landings (97.3% of 1,245t).
- The number of self-employed harvesters is down from 73 in 1998-99 to 131 in 1999-2000. The numbers of both self-employed winter season and both seasons harvesters are up by 88.0% and 83.3%, respectively. The number of self-employed summer season harvesters is up by 70.0% in 1999-2000.

Annual Summary of Harvesting Activities: *At a Glance*

	Jurisdiction				Total*
	Alberta	Saskatchewan	Manitoba	NWT	
Landings (t)	1,903	3,761	14,633	1,245	21,588
% Change from 1998-99	8.2%	13.6%	23.9%	-4.4%	18.7%
Landed Value (\$000)	1,422	4,659	27,161	1,525	35,907
% Change from 1998-99	17.1%	7.7%	17.3%	5.4%	15.7%
Self-Employed Harvesters	166	561	1,805	131	2,679
% Change from 1998-99	-1.8%	3.9%	4.8%	79.5%	6.7%
Major Harvested Species	Whitefish, Pickerel, northern pike	Whitefish, mullet, Pickerel, northern pike, lake trout	Whitefish, Pickerel, sauger, northern pike, perch, mullet	Whitefish, Pickerel, lake trout, northern pike, inconnu	Whitefish, Pickerel, sauger, northern pike, mullet, lake trout

*Note: * includes Northwestern Ontario; ** To protect the identities of harvesters where the number of harvesters is three or less, the “rule of three” <4 (less than four) is used.*

Glossary of Terms:

Delivery Point: A delivery point is a fish facility where fish harvesters sell their catches directly to the FFMC or indirectly through agents of the FFMC.

Fiscal Year: A fiscal year refers to the period from May 1 through to April 30 of the subsequent year. There are two fishing seasons in a fiscal year. Thus, 1999-2000 refers to the period May 1, 1999 to April 30, 2000. The summer season, which is the open water fishery, begins May 1 and ends October 30. The winter season is an ice fishery that begins when the lakes freeze, around November 1, and continues until spring thaw, usually about April 30.

Landed Quantity: The landed quantity is an estimate reflecting the weight of fish marketed to the FFMC by commercial harvesters. (Federal and provincial law requires harvesters to sell their catches, excluding sales made directly to final consumers, to the FFMC.) This estimate expresses the catch as if it were all harvested in one form, the live weight equivalent. Due to fish harvester's selling fish in a variety of forms (round, gutted, and gutted with head off), conversion factors are used to determine the live weight equivalent.

Landed Value: The landed value represents the payments received by fish harvester for fish sales to the FFMC. The payments are generally recorded *f.o.b. lakeside* although in some cases, especially in the north, payments are *f.o.b. a central delivery point* which may be some distance from the lake where fish are harvested. Harvesters receive both initial and final payments for their catches, the final payment is dependent on the FFMC's net earnings for the period. The landed values reported reflect the respective year's Canadian dollar value and include both the initial and final payments.

Marketed Value: The marketed value estimates the value of the year's catch as the product of the landed quantity of each species and the average market selling price for the year. Because the estimates do not carryover inventory from year to year, market value differs from the FFMC statement of annual fish sales.

Nominal Dollars: Nominal dollars are the current dollar amounts paid or received at the time of harvest or sale. Nominal dollars are not adjusted for inflation.

Product Weights: Product weights are the actual weights of the final product sold. Fish are sold in a variety of products forms (round, dressed fillets, deboned blocks, etc.) and product weights should not be confused with live equivalent weights.

Self-Employed Harvester: A self-employed fish harvester is generally the owner/operator of the fishing business. All self-employed harvesters must be licensed for commercial fishing. Note that in the tables reporting the distribution of landed values, the "rule of three" is used to protect the identities of fish harvesters who fall within an income interval that contains three or less harvesters. In such cases, the symbol <4 is used.

Full Time Equivalent Employment: Full time equivalent employment is calculated based on information for harvesting activities only and not associated with processing activities. It is calculated by dividing the number of weeks worked by the number of weeks (52) in a given year.

Landed Values
Western Canadian Freshwater Fisheries, 2000/01

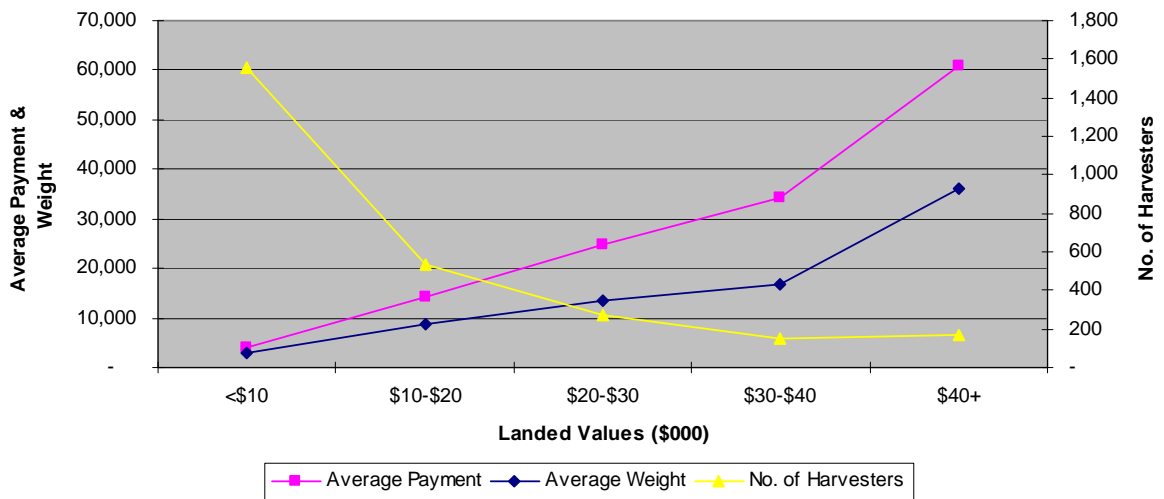

Figure 1.8
Number of Full-Time Equivalent Employment by Landed Value
Western Canadian Freshwater Fisheries, 1999/2000

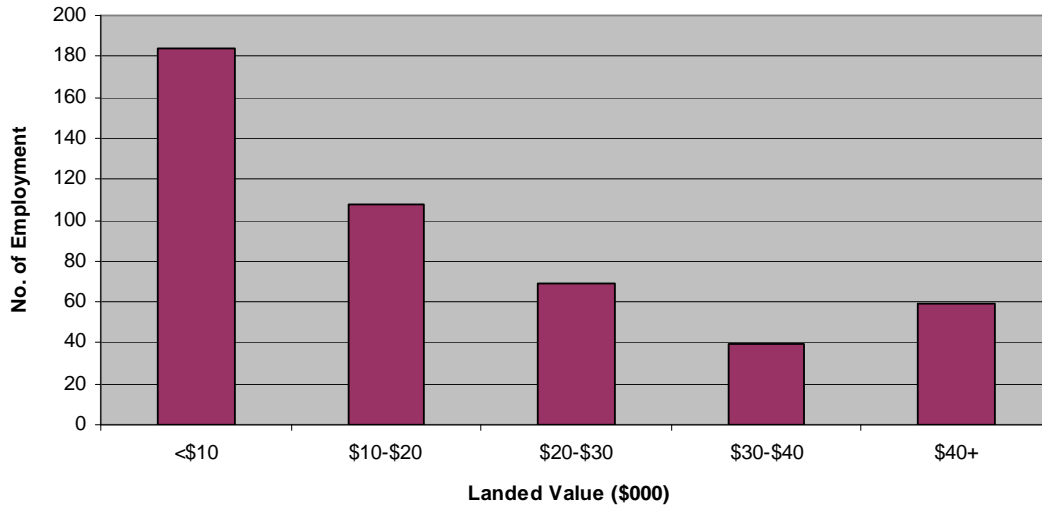

Table 1.4
Landings, Landed Value, Full-Time Equivalent Employment and Fishing Effort by
Landed Value
Western Canadian Freshwater Fisheries, 1999/2000

Landed Value	No. of Harvesters	Full-Time Employment	----- Averages Per Harvesters -----			
			Deliveries	Weeks	Weights (lb.)	Payments (\$)
\$0 - \$10,000	1,555	184	17	6	2,960	3,892
\$10,001 - \$20,000	531	107	34	11	8,622	14,298
\$20,001 - \$30,000	276	69	50	13	13,665	24,624
\$30,001 - \$40,000	146	39	53	14	16,876	34,314
\$40,001+	172	60	66	18	35,934	60,843

Note: (i) Weeks refer to a week in which fishing activities occurred; (ii) Payments refer to value paid to harvesters upon delivery.
