## Foreword

The Freshwater Fish Marketing Corporation (FFMC) and the Department of Fisheries and Oceans, Central and Arctic Region (DFO) have, for more than thirty years, co-operated in the development and maintenance of a commercial fisheries database. The harvest data are developed from the FFMC's purchase ticket, which records the catch and payment for every sales transaction between individual harvesters and the FFMC. The database provides comprehensive information on the commercial fishery (e.g. fish harvesters, lakes, delivery points, species, weeks, months, seasons of fishing, etc.). This data has been used by the FFMC, DFO, and the fisheries management agencies of the participating provinces and territory in the FFMC's area of operation. Data is also provided on request to other federal, provincial or territorial agencies, universities, and others interested in fisheries. The participating jurisdictions include Manitoba, Saskatchewan, Alberta, the Northwest Territories, and select parts of the northwest region of Ontario.

This report focuses on commercial freshwater fish harvesting activity in FFMC participating jurisdictions from May 1, 2005 to April 30, 2006. The period covers two distinct fishing seasons, the open water, summer fishery from May through October and the on ice, winter fishery from November through April. Marketing and historical trend information is included.

Section 1 provides harvesting data. Section 2 provides comparative analyses of each FFMC participating jurisdiction. Sections 3 through 6 provide similar analyses for each FFMC participating jurisdiction. Northwestern Ontario has been excluded from this section in consideration of the low percentage share of the province in freshwater fisheries. However, Northwestern Ontario has been included in Section 1 providing data by jurisdiction.

Persons interested in obtaining more information on commercial freshwater fisheries in FFMC participating jurisdictions may contact:

# Highlights

## 2005-2006

The following is a brief summary of key trends on commercial freshwater fish harvesting activity in FFMC participating jurisdictions for the fiscal year 2005-2006. This section is intended to provide highlights on landings, landed and market values, and the number of self-employed harvesters. Please see sections 1 through 6, for detailed data tables and trend analyses.

### **Section 1: *Western Canadian Freshwater Fisheries Summary***

- 16,735 metric tonnes (t) of fish were harvested. Landings fell by 5.9% from 2004-05.
- The landed and market values of the harvest were \$28.1 million and \$53.3 million, respectively.
- Of the total landings of 16,735t, pickerel accounts for 35.6%, up from 31.6% in 2004-05, whitefish accounts for 31.9%, down from 33.1% in 2004-05, and mullet accounts for 15.8% up slightly from 14.4% in 2004-05.
- In 2005-06, landings decreased by 5.9% compared to the preceding fiscal year. Landings for most species decreased, except for goldeye, pickerel, and mullet. Although the average landing price was slightly higher in 2005-06 compared to 2004-05, the total landed value fell by 5.7% due to the drop in landings.
- Of the total landings of 16,735t, Lake Winnipeg (6,293t) accounted for the largest volume distantly followed by Lake Winnipegosis (1,258t). Lake Winnipeg landings fell by 1.1% in 2005-06 compared to the previous year while Lake Winnipegosis' landings increased from 945t by 33.1%.
- The FFMC purchased catch from 2,395 self-employed harvesters in 2005-06 compared to 2,630 in 2004-05, a fall of 8.9%. The number of self-employed harvesters at the lower end of the landings range distribution accounted for most of the decrease.

## **Section 2: Analysis by Jurisdiction**

- Manitoba harvesters caught 69.4% of the total harvest and received 80% of the landed value which can be attributed to the high value of pickerel. Saskatchewan harvesters caught 16.5% of the harvest and received 10% of the landed value. Alberta caught 9.4% and received 7%. Northwest Territories caught 4.6% and received 3%. Northwestern Ontario caught and received less than 1%.
- Of the total 2,395 harvesters, Manitoba has 1,707 (71.3%), Saskatchewan has 506 (21.1%), Northwest Territories has 95 (4.0%), and Alberta has 86 (3.6%). Northwestern Ontario has less than 1% of total harvesters.

## **Section 3 - 6: Provincial Overview - (Alberta, Saskatchewan, Manitoba, Northwest Territories)**

### ***Alberta:***

- 1,574t of fish were harvested. Landings fell by 6.4% from 2004-05.
- Landings for all species fell from the previous year. Whitefish, which accounts for 91.7% of provincial landings, decreased by 5.9%.
- The landed and market values of the harvest are \$1.9 million and \$3.7 million, respectively. Total landed value decreased by roughly the same percentage as the volume (6.5%).
- Lesser Slave Lake accounted for the largest volume (44.5%) followed by Utikuma Lake (17.9%).
- There were 86 self-employed harvesters in 2005-06 down from 105 (18.1%) in 2004-05. The significant decrease in summer season harvesters may be an effect of the regulatory changes in Alberta removing access to summer quota.
- The number of self-employed winter season harvesters is up by 29.6% in 2005-06 while the number of self-employed summer season harvesters is down by 41.5%. The number of self-employed harvesters is down by 27.0% in both seasons.

### ***Saskatchewan:***

- 2,756t of fish were harvested. Landings fell by 12.9% from 2004-05.
- Except for Whitefish, landings for all other species decreased in 2005-06. Whitefish accounts for 35.9% of the total harvests, up by 2.5% in 2005-06, followed by mullet at 20.4%, down by 28.3% in 2005-06.

- The landed and market values of the harvest are \$2.8 million and \$6.0 million, respectively. The total landed value decreased by 12.1% in 2005-06.
- Reindeer Lake accounted for the largest volume (13.7% of 2,760t) followed by Ile-a-la Crosse lake (12.9% of 2,760t).
- The number of self-employed harvesters decreased from 590 in 2004-05 to 506 in 2005-06 across all categories. The number of self-employed winter, and summer harvesters fell by approximately 12.0% in 2005-06. The number of self-employed harvesters who worked both summer and winter fell by 60.0%.

***Manitoba:***

- 11,621t of fish were harvested. Landings fell by 3.2% from 2004-05.
- Expect for pickerel and mullet, which account for a significant proportion of harvests, landings fell for all other species compared to 2004-05. Pickerel, which accounts for 46.5% of total harvests, increased by 7.7% in 2005-06, and whitefish, which accounts for 19.7%, fell by 14.3% in 2005-06.
- The landed and market values of the harvest are \$22.7 million and \$41.7 million, respectively. Total landed value is down by 4.4% from the previous year.
- Lake Winnipeg accounts for most of the catch (54.2% of 11,621t) followed by the Lake Winnipegosis (10.8% of 11,621t).
- The number of self-employed harvesters is 1,707, down by 6.3% from the previous year. The number of self-employed winter season harvesters is up by 2.0% in 2005-06 and is down by 5.8% for summer season and 19.2% for both seasons' harvesters.

***Northwest Territories:***

- 905t of fish were harvested. Landings fell by 2.5% from 2004-05.
- Except for whitefish, which account for a significant proportion of harvests, landings of all species fell by 15.5% in 2005-06. Whitefish accounts for 80.8% of the total harvests 905t and is up by 1.2% in 2005-06. In contrast, pike which accounts for 6.4% of 905t, is down by 7.9% in 2005-06.
- The landed and market values of the harvest are \$0.8 million and \$2.0 million, respectively. The total landed value decreased by 5.4% from the previous year.
- Great Slave Lake accounts for most for the landings (97.7% of 905t) followed by Kakisa Lake (2.7% of 905t).

- The number of self-employed harvesters is down from 111 in 2004-05 to 94 in 2005-06. The number of self-employed winter season harvesters is down by 60.0% while the number of self-employed summer season harvesters is up by 4.8% in 2005-06. The number of self-employed harvesters who worked both summer and winter is down by 31.4% in 2005-06.

## Annual Summary of Harvesting Activities: *At a Glance*

	Jurisdiction					
	Alberta	Saskatchewan	Manitoba	NWT	Ontario	Total
Landings (t)	1,574	2,756	11,621	905	4	16,736
% Change from 2004-05	-6.4%	-12.9%	-3.2%	-2.5%	-20.0%	-5.9%
Landed Value (\$000)	1,896	2,811	22,697	817	3	28,117
% Change from 2004-05	-6.5%	-12.0%	-4.4%	-5.4%	-40.0%	-5.7%
Market Value (\$000)	3,687	5,987	41,671	1,967	6	53,318
% Change from 2004-05	0.8%	-3.3%	-4.7%	2.9%	0.0%	-3.9%
Self-Employed Harvesters	86	506	1707	95	<4*	2395
% Change from 2004-05	-18.1%	-14.2%	-6.3%	-15.3%	--	8.9%
Major Harvested Species	Whitefish	Whitefish	Pickerel	Whitefish	Pike	Whitefish

Note: \* To protect the identities of harvesters where the number of harvesters is three or less, the "rule of three" <4 (less than four) is used.

## Glossary of Terms:

**Delivery Point:** A delivery point is a fish facility where fish harvesters sell their catches directly to the FFMC or indirectly through agents of the FFMC.

**Fiscal Year:** A fiscal year refers to the period from May 1 through to April 30 of the subsequent year. There are two fishing seasons in a fiscal year. Thus, 2005-2006 refers to the period May 1, 2005 to April 30, 2006. The summer season, which is the open water fishery, begins May 1 and ends October 30. The winter season is an ice fishery that begins when the lakes freeze, around November 1, and continues until spring thaw, usually about April 30.

**Landed Quantity:** The landed quantity is an estimate reflecting the weight of fish marketed to the FFMC by commercial harvesters. (Federal and provincial law requires harvesters to sell their catches, excluding sales made directly to final consumers, to the FFMC.) This estimate expresses the catch as if it were all harvested in one form, the live weight equivalent. Due to fish harvester's selling fish in a variety of forms (round, gutted, and gutted with head off), conversion factors are used to determine the live weight equivalent.

**Landed Value:** The landed value represents the payments received by fish harvester for fish sales to the FFMC. The payments are generally recorded *f.o.b. lakeside* although in some cases, especially in the north, payments are *f.o.b. a central delivery point* which may be some distance from the lake where fish are harvested. Harvesters receive both initial and final payments for their catches, the final payment is dependent on the FFMC's net earnings for the period. The landed values reported reflect the respective year's Canadian dollar value and include both the initial and final payments.

**Marketed Value:** The marketed value estimates the value of the year's catch as the product of the landed quantity of each species and the average market selling price for the year. Because the estimates do not carryover inventory from year to year, market value differs from the FFMC statement of annual fish sales.

**Nominal Dollars:** Nominal dollars are the current dollar amounts paid or received at the time of harvest or sale. Nominal dollars are not adjusted for inflation.

**Product Weights:** Product weights are the actual weights of the final product sold. Fish are sold in a variety of products forms (round, dressed fillets, deboned blocks, etc.) and product weights should not be confused with live equivalent weights.

**Self-Employed Harvester:** A self-employed fish harvester is generally the owner/operator of the fishing business. All self-employed harvesters must be licensed for commercial fishing. Note that in the tables reporting the distribution of landed values, the "rule of three" is used to protect the identities of fish harvesters who fall within an income interval that contains three or less harvesters. In such cases, the symbol <4 is used.

**Full Time Equivalent Employment:** Full time equivalent employment is calculated based on information for harvesting activities only and not associated with processing activities. It is calculated by dividing the number of weeks worked by the number of weeks (52) in a given year.

## Annex: Western Canadian Freshwater Fisheries - *List of Species*

<b>Common Name</b>	<b>Genus Name</b>
Whitefish	<i>Coregonus clupeaformis</i>
Pickeral	<i>Sander vitreus</i>
Sauger	<i>Sander canadensis</i>
Lake Trout	<i>Salvelinus namaycush</i>
Northern Pike	<i>Esox lucius</i>
Tullibee	<i>Coregonus artedii</i>
Perch	<i>Perca flavescens</i>
Mullet	<i>Catostomus commersonii</i>
Carp	<i>Cyprinus carpio</i>
Inconnu	<i>Stenodus leucichthys</i>
Goldeye	<i>Hiodon alosoides</i>
White Bass	<i>Morone chrysops</i>
Burbot	<i>Lota lota</i>
Drum	<i>Aplodinotus grunniens</i>
