

Global sea level is rising

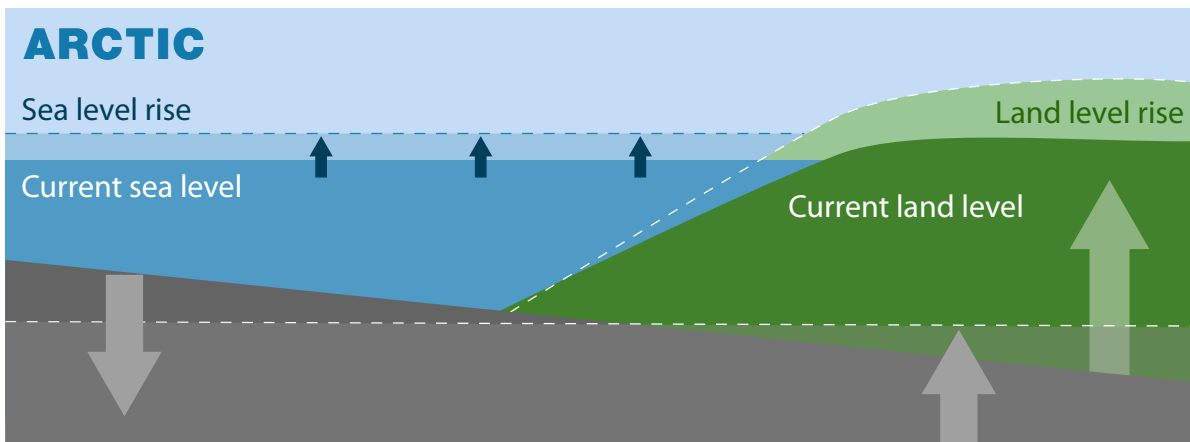

In Canada the sea level rise depends on where you live

SEA LEVEL FALLING OR STABLE

WEST COAST OF VANCOUVER ISLAND

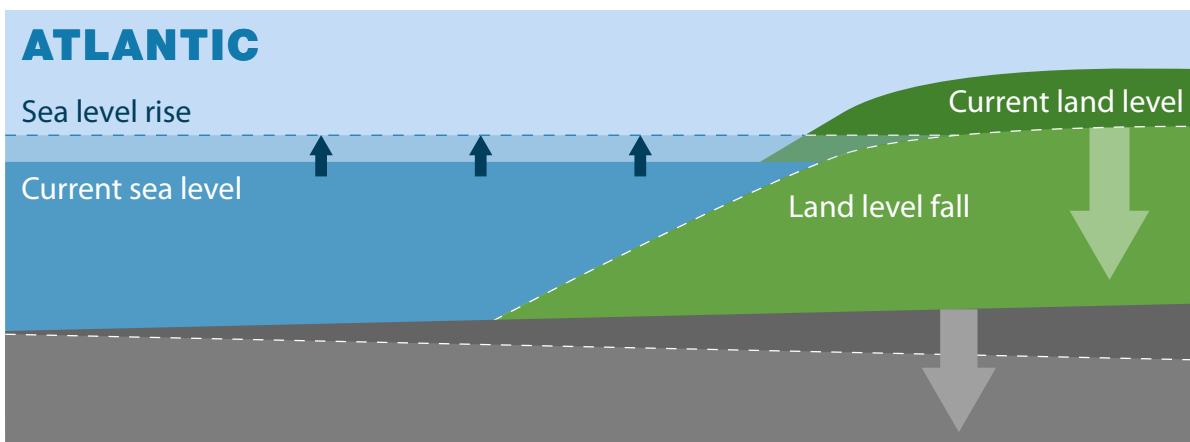

Sea levels are rising but the land is rising faster due to continental drift, leading to a local fall in sea level

SEA LEVEL MOSTLY FALLING

HUDSON BAY

Sea levels are rising but the land is rising faster from post-glacial adjustment, thus Arctic sea level change depends on the rate of land rising

SEA LEVEL RISING

HALIFAX AREA

In Halifax, sea level is rising as the land falls from post-glacial adjustment

In other Atlantic areas, sea level is either steady or falling

SEA LEVEL RISE IS A SERIOUS THREAT

on some of Canada's coastlines
